

AUTHOR GUIDELINES (ENGLISH VERSION)

“Investigación en Discapacidad” (Disability Research) has as its objective the publishing of relevant, innovative, and informative articles on the study of the pathological bases, prevention, diagnosis, treatment, and rehabilitation of disability, from the viewpoint of basic, clinical technological, epidemiological, and sociomedical research. The topics considered for publication in the journal correspond to the biomedical, clinical, chemo-biological, molecular, psychological, technological development, and social investigation areas. **“Investigación en Discapacidad”** accepts articles for publication according to the following sections: a) Original article; b) Review article; c) Clinical case, and d) General interest.

Language: Articles may be written in Spanish or in English. It will be the responsibility of the authors to duly redact the abstracts and manuscripts in the respective language.

The Manuscript: This should be accompanied by a cover letter, addressed to the Editor-in-Chief, in which the scientific or clinical importance of the work will be described briefly; the type of article will be specified, and it should be declared that there is not conflict of interest, or were there one, its implication will be specified. Two peer reviewers should be suggested and their contact data should be annexed (name, affiliation, electronic address, and telephone number); in the case of there being an undesired reviewer for the work, this should be specified in the letter. The letter should be signed by the corresponding author. Likewise, the format of the ceding of the rights of the author will be annexed, signed by all of the authors.

All of the works should have a title page with the following information: Title of the article; short title of no more than 45 characters, and the complete name and institutional affiliation of each author, citing the corresponding author with his/her electronic address telephone number, and complete postal address.

Structure of manuscript:

Abstract: The articles should annex an abstract of no more than 250 words, accompanied by 5 key words based on the criteria of the Medical Subject Headings-Annotated Alphabetic List (National Institutes of Health, National Library of Medicine, Library Operations, Medical Subject Headings, Bethesda, MD 20894, USA, <http://www.nlm.nih.gov/mesh/>). Articles written in Spanish should present the abstract, as well as the key words, in both Spanish and English. References should not be cited in the abstract.

Body of the manuscript: This will depend on the type of article under consideration:

- a) **Original Research Article.** These will be unedited works of investigation. The articles will be divided into sections, taking the following order into consideration: Introduction; Materials and Methods; Results; Discussion; Acknowledgments; References, Tables, and Figure Legends. Manuscripts should not exceed 4,000 words without considering the references and should contain a maximum of 5 Tables and Figures in total. The figures or images should be annexed in independent files.

- b) **Review Articles.** Review articles will be accepted by invitation or may be considered according to the following specifications: They should be up-to-date, based extensively on reports published in the scientific literature, be focused on a theme of investigation that is clearly explained, with the objective of disseminating recently updated Information on a specific theme. The responsible author should justify his/her broad experience in the theme in order to be considered an opinion leader. The manuscripts can or cannot include subtitles; they should contain no more than 5,000 words without considering the references. It is recommended that the number of references not exceed 40 citations. These articles can include a maximum of 5 figures and tables in total.

- c) Clinical Case.** Descriptions of one or more cases of exceptional observation, which suppose an important contribution to the knowledge of the physiopathology, in the field of disability (maximum, 2,000 words without considering references and 3 tables and/or figures). A discussion should be conducted of the authors' findings based on the scientific literature to reflect the contribution of the writing.
- d) General Interest.** Articles of general interest will be manuscripts and/or reviews related with science, with the objective of divulgation to the general public, the educational, cultural, and social aspects associated with the scientific undertaking. It is recommended that these be written in colloquial language with a maximum of 2,500 words.

Acknowledgments: In this section, recognition will be given to participants whose contribution do not fulfill authorship criteria; for example, technical assistance or professional opinion. Similarly, the financial sources granted for the development of the study may be described.

References: The references should be numbered within the text in superscript, in Arabic numbers, and follow the order in which they are mentioned for the first time. When citing a work that has already been accepted but not yet published, it should be referred as "In Press". For complementary information, please consult: www.icmj.gob; www.nlm.nih.gov/bsd/uniform_requirements.html

Examples

Article: Bastida MF, Delgado MD, Wang B, Fallon JF, Fernández-Terán M, Ros MA. Levels of Gli3 repressor correlate with BMP4 expression and apoptosis during limb development. *Dev Din.* 2005; 231:148-160.

When there are more than six authors, the first three of these should be mentioned, with the immediate addition of the abbreviation "et al."

Terauchi Y, Kamamoto I, Kubota N, et al. Glucokinase and IRS-2 are required for compensatory beta cell hyperplasia in response to high-fat diet-induced insulin resistance. *J Clin Invest.* 2007; 117(1):246-257.

Book: Author/s. Title of the book. Edition. Place of publication: Publishing house; Year.

Gilbert, Scott F. *Developmental Biology.* 7th edition. Sunderland, Massachusetts. Sinauer Associates; 2003.

Chapter of a book: Author/s of the chapter. Title of the chapter. In: Director/Coordinator/Editor of the book. Title of the book. Edition. Place of publication: Publishing house; Year. Initial page-final page of the chapter.

Géraudie J, Alimenko MA, Smith MM. The dermal skeleton. In: Ferreti P, Géraudie J. *Cellular and Molecular Basis of Regeneration: From Invertebrates to Humans.* 1st edition. New York: John Wiley & Sons; 1998. pp. 167-185.

Tables: These should be numbered consecutively according to the order cited in the text, with the titles in the upper part and the meaning of the abbreviations, as well as the explicative notes at the foot of the page. These should be included at the end of the manuscript after the References section.

Figures or tables: These should be sent in separate files and in the same order as they are cited in the work. Figures will be sent in JPEG format with a minimal resolution of 300 dpi and indicating the number of appearance in the text in the file name. The figure legends will be included at the end of the manuscript, after the References section and the tables.

Sending the manuscript

Writings should be sent in electronic format via electronic mail or on a disk that contains the complete text in word processors compatible with Microsoft Word. The text should be written in Arial 12 font, double-spaced, and without justification, with

2.5-cm margins on all four sides of the page, with pages numbered in the lower center of the page.

The writings for submission for publication will be sent to the following electronic address: indiscap@inr.gob.mx with a copy to indiscap@gmail.com or these can be sent with a CD to: Laboratorio de Medicina Genómica, 6to piso del CENIAQ, INR, Av. México-Xochimilco 289, Col. Arenal de Guadalupe, Deleg. Tlalpan, CP 14389, México, D.F., México.

The Editorial Office will acknowledge works sent to the journal and will inform the corresponding author regarding their acceptance, rejection, or conditions based on the commentary and evaluation of the peer reviewers.

Protection of the persons and of the animals that participate in the research:

When the study is carried out with humans, the authors should indicate that the procedures comply with the ethical principles of the commission responsible for human experimentation (at the institutional and national levels) and the Declaration of Helsinki of 1975, revised in 2008. In the case of non-compliance with the latter, the authors should explain the reasons and demonstrate that the Ethical Committee of their institution has approved the doubtful aspects of the study. When experiments are performed with animals, compliance should be indicated with national and international norms for the care and use of laboratory animals. These considerations should appear in the Materials and Methods section.

Literary Property: The sending of the manuscript to the journal implies that the latter is a work that has not been published (except in Abstract form) and that it will not be sent to another journal.

Once the manuscript has been accepted, a letter of the ceding of author rights will be sent by the journal editor via electronic mail. This letter will be signed by all of the authors of the manuscript. The authors rights become the property of the journal *Investigación en Discapacidad/Investigation in Disability* and the manuscript

cannot be published (neither completely, nor partially) in any other place without the written consent of the journal editor.

Accepted works can be consulted at the following electronic page:
